

MAGNA•LATCH

Use the safest...

Series 2
MAGNA-LATCH®
MAGNETIC SAFETY GATE LATCH

Endorsed by
Laurie Lawrence,
former Australian
Olympic Swimming
Coach and internation-
ally recognized child
water safety advocate.

- Magnetically triggered latching
- Key lockable safety (two models)
- Adjusts horizontally *and* vertically
- Patented "Lost Motion" Technology
- Quick and easy to install
(now with convenient self-drilling screws)

KEY
LOCKABLE

Features

- Patented magnetic self-latching
- Exceeds international barrier/safety codes
- Quality molded polymers & stainless steel
- Key lockable (Top Pull & Vertical Pull)
- Quality Assurance ISO 9001 manufacturer
- Engineered for ease of installation
- Latches in the "locked" position
- Won't disengage from shaking & pulling
- Unprecedented adjustability
- Tested to 400,000 cycles

Benefits

- No mechanical jamming during closure
- Unprecedented reliability & safety
- No rusting, binding or staining
- Added safety and peace-of-mind
- Lifetime Warranty
- Reduced installation time (costs)
- Exceptional safety & reliability
- Can't be forced open
- Easy to install and maintain
- Proven to last the test of time

Independently
tested to meet
Pool Barrier
Safety Codes

Magnetic
triggering
means no
resistance
to closure!

MAGNA•LATCH® Safety Gate Latches are a revolutionary breakthrough in latching security for gates around swimming pools, homes and child safety areas.

Powered by super-strong "Permanent Magnets", which never lose power, these quality latches incur no mechanical interference to closure and so offer unprecedented reliability, safety and child resistance.

The popular "Top Pull" model is designed especially for swimming pool gates but can be fitted to any gate where child safety is important. The shorter "Vertical Pull" model is recommended for gates at least 5' (1.5m) tall. This model is also known as the "Pet Latch", as it provides security for pet safety gates.

All latches adapt readily to most new or existing gates and any gate material. Two models are key-lockable for added safety.

The latest "Series 2" latches can be adjusted vertically and horizontally to ensure safe, reliable latching at any time during or after installation.

Vertical adjustment is quick and easy because the latch body slides up and down dovetail-style tracks for easier, sturdier installation.

Horizontal adjustment is achieved by adjusting a screw within the "Striker Body" so that the striker can be adjusted across gaps ranging from 3/8"-17/16" (9-37mm).

The "Series 2" models provide extra impact resistance and durability on larger gates and also against heavy pedestrian traffic.

MAGNA•LATCH

Pet Security Gate Latch

MAGNA•LATCH is also suitable for house and garden gates where pet security and pet access control are important.

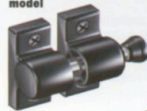

Prevents pets from escaping and keeps them safe from unwanted intruders

TOP PULL model

VERTICAL PULL model ("PET LATCH" model)

SIDE PULL model

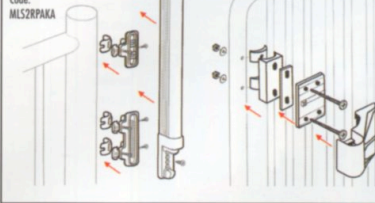

MAGNA•LATCH has been tested to more than 400,000 cycles. Most swimming pool barrier codes require gates to be self-closing and self-latching. The latch has been designed and independently tested to meet strict international safety codes.

ROUND POST ADAPTOR KIT

The "Round Post Adaptor Kit" is an optional kit for mounting Magna•Latch "Top Pull" or "Vertical Pull" latches to gates and fences with round posts.

Code: MLS2RPKA

The kit includes adaptor brackets and shims to fit most common chainlink and railing post diameters.

Post diameters: 1 7/8" (48-50mm), 2 1/8" (60mm), 2 7/8" (73mm)
Gate diameters: 1 3/8" (35mm), 1 5/8" (41mm), 1 7/8"-2" (48-50mm)
 * The 1 3/8" adaptor is used on gate frames to fit diameters of 1 7/8"-2".

MAGNA•LATCH

Series 2
MAGNA-LATCH®
 MAGNETIC SAFETY GATE LATCH

Detailed fitting instructions included inside product packaging

Ideal for Child Safety Areas

INSTALLATION REQUIREMENTS

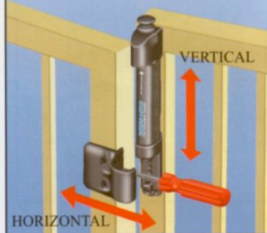

(Top Pull & Vertical Pull models)

For swimming pool and other child safety gates, most Barrier Codes and Standards specify the following requirements:

- The pool gate must open outward, away from the pool, so the latch must be fitted to the *outside* of the pool gate
- The latch release knob is to be at least 60" (1500mm) above finished ground
- Fence height to be minimum 48" (1200mm) above finished ground

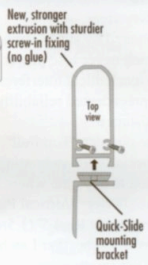

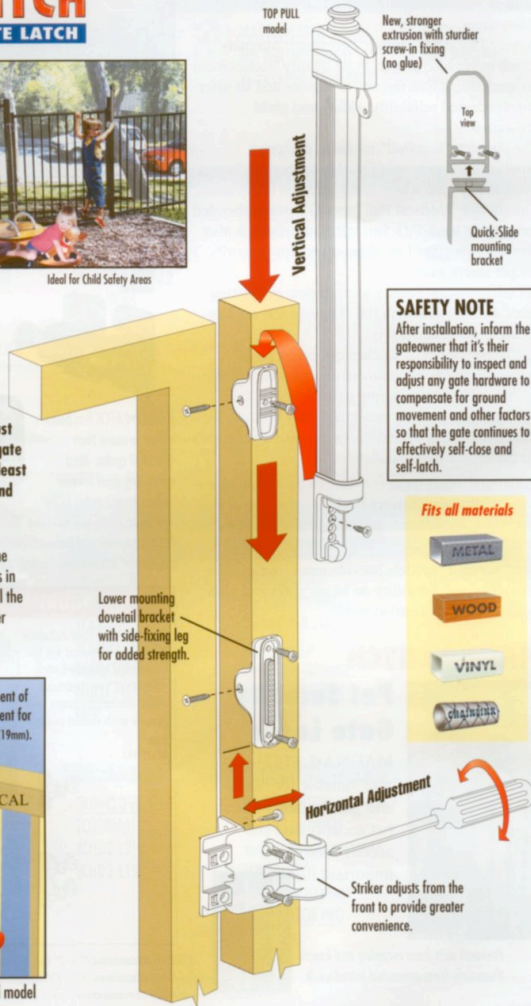

Always confirm these requirements with the appropriate local pool or safety authorities in your area, as regulations may vary. Install the latch in accordance with local fence/barrier regulations.

Adjustable striker offers horizontal adjustment of $\frac{3}{8}$ " - $1\frac{1}{16}$ " (9-37mm) and vertical adjustment for "TP" of $1\frac{1}{2}$ " (38mm) and for "VP" of $\frac{3}{4}$ " (19mm).

Vertical Pull model

Quick and easy installation

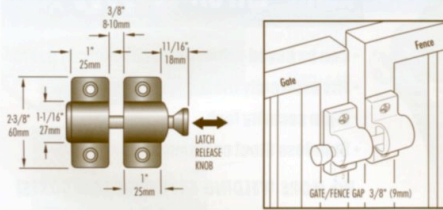

SAFETY NOTE
 After installation, inform the gateowner that it's their responsibility to inspect and adjust any gate hardware to compensate for ground movement and other factors so that the gate continues to effectively self-close and self-latch.

Fits all materials

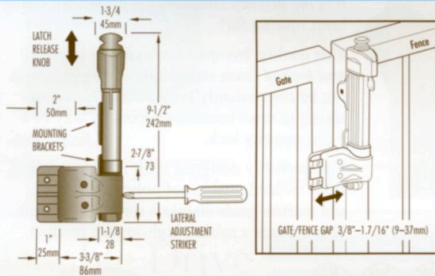

MAGNA • LATCH Side Pull model

Code	Applications	Color
MLSPBX	General-Purpose House Gates	Black, White

Description: The ideal general-purpose, magnetic latch for gates around the house and garden. Suitable for a wide variety of uses where a non-key lockable latch is needed. Reliable, effective and unobtrusive. When used on picket-style swimming pool gates, a compliant acrylic shield must be used to prevent latch access by toddlers. Consult local authorities for height measurement/requirements on swimming pool gates.

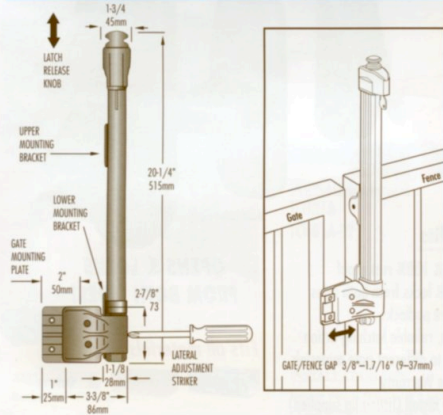

MAGNA • LATCH Vertical Pull model

Code	Applications	Color
MLVPS2BGA	Pet, Pool & Child Safety Gates	Black, White

Description: A shorter version of the popular "Top Pull" model latch. Shares the same features and is ideal for safety gates around swimming pools and child safety areas. Also ideal as a pet gate latch for the backyard. Highly child resistant, magnetic latching (no mechanical resistance to closure), key lockable for added security, fully adjustable two-part design that provides easy, accurate installation and long-term, reliable performance. Fits most gates and all gate materials. Ideal for gate/fence heights of 60" (1500mm) or above. Consult local authorities for height measurement/requirements on swimming pool gates.

MAGNA • LATCH Top Pull model

Code	Applications	Color
MLTPS2BGA	Swimming Pool & Child Safety Gates	Black, White

Description: The most popular Magna-Latch model. The ideal gate latch for safety gates around swimming pools and child safety areas such as daycare centers. Highly child resistant, magnetic latching (no mechanical resistance to closure), key lockable for added security, fully adjustable two-part design that provides easy, accurate installation and long-term, reliable performance. Fits most gates and all gate materials. Fits most gate/fence heights but is ideal for 48" (1200mm) gates/fences, as the latch can be installed so that the release knob is out of reach of small children. Consult local authorities for height measurement/requirements on swimming pool gates.
